PROJECTS

Airbnb Clone (Major Project – Full Stack)
- Built a full-stack Airbnb clone with user authentication, property listing (add/update/delete), image uploads, pricing, and booking simulation. Designed with responsive frontend using HTML, CSS, and JavaScript; backend powered by Node.js, Express.js, and MongoDB.
  Tech: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

Online Bookstore Web App
- Developed a MERN-based bookstore with user login, book CRUD functionality, and image handling.
  Tech: React, Node.js, Express.js, MongoDB

Portfolio & Mini Projects
- Created a personal portfolio website (MERN), Weather App with real-time API, and several To-Do apps with local storage.
  Tech: MERN Stack, REST APIs, JavaScript"

EXPERIENCE

Self-Initiated Full-Stack Developer Projects
Remote | Apr 2023 – Present
- Independently developed multiple MERN stack applications simulating real-world platforms like Airbnb and online bookstores.
- Applied best practices in component-based architecture, RESTful APIs, authentication, and responsive design.
- Collaborated with online learning platforms and college coursework for continuous project-based learning.
